

Sanitising Your Point Of Use / Plumbed in Cooler

Suitable for use on all water coolers the enclosed sanitiser treats all water lines, tanks and dispensing taps that it comes into contact with. WaterCoolers Direct.com Ltd offer this set of instructions as 'Guidance Only'. Therefore, WaterCoolers Direct.com Ltd and its employees or representatives cannot be held responsible for any work carried out by YOU and/or ANY third party using the instructions either in writing or over the telephone via the HelpDesk.

For Point Of Use / Plumbed in Coolers:

1. Shut off the water using your Shut Off Valve on the inlet pipe

2. Replace your coolers filter with the Mini Dosa using the push fit connectors

3. Unscrew the see through container at the base of your Mini Dosa
4. Put 20ml of Sanitiser fluid into the container and refit to the Mini Dosa
5. Empty your coolers tank through the taps into a bucket

6. Turn the water back on using the Shut Off Valve
7. Leave the machine for 10 minutes
8. While you are waiting clean your cooler with your Aqua Dosa Wipes

9. Shut off water
10. Empty your coolers tank through the taps

11. If you have a hot machine turn off the red hot switch and then drain the water through your hot tank drain (normally located at the base or back of your machine)
12. Replace the filter; **if your filter is 6 months old then it needs to be replaced, for more information call our HelpDesk on: 0800 7311 491**

13. Turn on the water using your Shut Off Valve

14. If you have a hot machine leave for 5 minutes to ensure that the hot tank is full and turn on the red hot switch
15. Flush half a bucket of water through your taps to remove any remaining Sanitiser Fluid

16. Taste water to ensure quality
17. Your cooler is now ready to use
